ABOUT THE EVENT

Armenia's Flagship Engineering Event

Since 2017, Armenia – Engineering Week has been the country's flagship engineering event, bringing together local and international industry leaders, multinational companies, researchers, professionals, students, policymakers, and technology enthusiasts to advance engineering excellence and foster international collaboration. As Armenia's largest engineering event series, it showcases the latest technological achievements while creating opportunities for collaboration across industry, academia, government, and the international innovation ecosystem.

The 2026 edition is dedicated to **"Physical AI: Engineering Intelligence for the Real World"** — exploring how AI rapidly expands beyond digital applications into physical systems. Physical AI represents the convergence of artificial intelligence with sensors, electronics, embedded computing, control systems, mechanical engineering, manufacturing, testing, and safety engineering. AEW 2026 examines this transformation as both a technological frontier and a strategic opportunity for strengthening Armenia's engineering capabilities and global competitiveness.

Programme

THREE DAYS · TWO CITIES · ONE VISION

01

Opening Day

October 2, 2026

● Engineering City High-Tech Accelerator · Yerevan

- Official opening ceremony with government representatives, international organizations & leading companies
- Keynote presentations on the future of engineering and Physical AI
- Panel discussions: automotive engineering, aerospace & semiconductors
- Tracks: AI, cybersecurity, high-performance computing & smart manufacturing

02

Engineering Expo

October 3, 2026

● Engineering City · Yerevan

- Engineering Expo showcasing cutting-edge technologies, innovative products & research initiatives
- Industry expert-led panel discussions addressing emerging technologies & industry trends
- Interactive workshops on engineering challenges & solutions
- Media art exhibitions at the intersection of engineering, creativity & technology

03

Youth Innovation

October 4, 2026

● Vanadzor Technology Center · Vanadzor

- Youth Engineering Expo highlighting next-generation innovation in engineering, high-tech & science
- Practical seminars designed to strengthen technical skills among young engineers & students
- Hands-on workshops fostering knowledge sharing & innovation
- Inspiring the next generation of engineers, scientists, researchers & technology leaders

TECHNICAL TRACKS

Automotive Engineering

Aerospace

Semiconductors

Cybersecurity

Artificial Intelligence

High-Performance Computing

Smart Manufacturing

Embedded Computing

RF & Communication

Control Systems

© Armenia – Engineering Week 2026 · Since 2017

Organized by Enterprise Incubator Foundation (EIF) & Engineering Association of Armenia
011 219 797 · info@eif.am · 52/26 Bagrevand Street, Yerevan
